Work Experience

Data Analyst – Aujan Coca-Cola Beverage Company (ACCBBC)

Aug 2025 – Present

Riyadh Head office

- Collect, clean, and transform raw datasets from multiple sources (Excel, Database, and external files) using Power Query, ETL pipelines and Microsoft Fabric.
- Participate in performance review with sales team to drive BU initiatives and fulfilling GAPs.
- Identify product sales trends to help stakeholders in making business decisions.
- Design and build interactive dashboards and reports in Power BI to track KPIs, trends, and business performance.
- Leveraged AI tools (Claude Code) to automate and enhance business reports, developed internal web portals to support business operations, and utilized Microsoft Azure cloud services to manage the portals and databases.
- Update and distribute the daily sales report to internal teams and branch offices, ensuring timely access to performance data.

Information and Communication Technology - AECOM

Aug 2023 – April 2025

Neom, Neom Airport PMC

- Reviewed ICT system designs and contractor submissions to ensure compliance with project, technical, and regulatory standards.
- Coordinated with stakeholders to gather requirements, define scope, and validate implemented ICT and airport special systems.
- Supervised installation and configuration of critical IT infrastructure (networks, cabling, security, and special airport systems).

Projects

Graduation Project: I conducted system analysis and designed a school bus management system. I utilized the Unified Modelling Language (UML) methodology to analyze certain processes. I was responsible for converting the ERD diagram into an operational database and designing the user interfaces extensively.

Data Analysis Project: "Supermarket Sales Project" is a data analysis project that presents comprehensive insights, including the aggregate sales figures, total expenditure across all product categories, and the sales volume for each specific product type, among other metrics.

Education

Bachelor's degree in Management Information Systems (GPA: 4.72/5.0)

July 2019 - July 2023

University of Tabuk, Tabuk, KSA

Courses / DataCamp – Tuwaiq - Coursera

- | | |
|--|--|
| • Data Ingestion and Semantic Models with Microsoft Fabric | • Business Intelligence Path |
| • Software Design: Modeling with UML | • Data Visualization and Dashboards with Excel |
| • SQL in Business Analysts Track | • Associate Data Engineer in Snowflake |
| • Importing Data in Python | • Data analysis using Power BI |
| | • Reporting in SQL |

Technical Skills

- | | |
|--------------------------------|--|
| • Python | • Microsoft Azure & Google BigQuery |
| • SQL & DBMS | • Power Automate |
| • Microsoft Fabric | • Extract, Load and Transformation (ETL) |
| • Microsoft Power BI - DAX | • Power Query Editor |
| • UML, ERD, Use Case Modelling | • Claude Code |
