Professional Experience

Data Analyst, Aujan Beverage Company 08/2025 – Present | Riyadh, KSA

- Collect, clean, and transform raw datasets from multiple sources (Excel, Database, and external files) using Power Query, ETL pipelines and Microsoft Fabric
- Participate in performance review with sales team to drive BU initiatives and fulfilling GAPs
- Identify product sales trends to help stakeholders in making business decisions
- Design and build interactive dashboards and reports in Power BI to track KPIs, trends, and business performance
- Leveraged AI tools (Claude Code) to automate and enhance business reports, developed internal web portals to support business operations, and utilized Microsoft Azure cloud services to manage the portals and databases
- Update and distribute the daily sales report to internal teams and branch offices, ensuring timely access to performance data.

ICT Graduate, AECOM, NEOM Airport Projects 08/2023 – 04/2025 | NEOM

- Reviewed ICT system designs and contractor submissions to ensure compliance with project, technical, and regulatory standards
- Coordinated with stakeholders to gather requirements, define scope, and validate implemented ICT and airport special systems
- Supervised installation and configuration of critical IT infrastructure (networks, cabling, security, and special airport systems).

Projects

Automated Weather Data Pipeline, Data Engineering Project

Collects live weather data from OpenWeatherMap across 11 cities every 10 minutes via GitHub Actions. Python + Prefect loads it into BigQuery, SQL transforms aggregate it into daily summaries, temperature rankings, and anomaly flags. Results are served through a Flask API and visualized in both a custom HTML dashboard and Looker Studio.

E-commerce Data Pipeline, Data Engineering Project

Pulls product, user, and cart data from the Store API using Python, loads it into Google BigQuery, runs SQL transformations to build analytics tables (top products, customer purchase summaries, cart revenue), and visualizes the results in a Looker Studio dashboard. Orchestrated with Prefect Cloud.

Education

Bachelor's degree in Management Information Systems, University of Tabuk 07/2019 – 07/2023 | Tabuk, KSA

Skills

- | | |
|--------------------------------|--|
| • Python | • SQL & DBMS |
| • Microsoft Fabric | • Microsoft Power BI - DAX |
| • UML, ERD, Use Case Modelling | • Microsoft Azure & Google BigQuery |
| • Power Automate | • Extract, Load and Transformation (ETL) |
| • Power Query Editor | • Claude Code |

Courses / DataCamp – Tuwaiq – Coursera

- | | |
|--|--|
| • Software Design: Modeling with UML | • SQL in Business Analysts Track |
| • Importing Data in Python | • Business Intelligence Path |
| • Data Visualization and Dashboards with Excel | • Associate Data Engineer in Snowflake |
| • Data analysis using Power BI | • Reporting in SQL |
| • Data Ingestion and Semantic Models with Microsoft Fabric | • Relational Database Administration (DBA) |
